AHMED HASSAN SHEHATA

Full-Stack Web Developer · PHP · Laravel · React · SaaS

+20 155 430 0351 | ahmedhassanshehata551@gmail.com | Beni Suef, Egypt | LinkedIn Profile

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing and deploying scalable web applications using PHP, Laravel, MySQL, JavaScript, and React. Specialized in building ERP, CRM, HR, SaaS, and business management systems from concept to deployment, with strong expertise in modular Laravel architecture, multi-tenant SaaS design, role-based access control, and RESTful API development. Recently served as a Reserve Information Systems Officer in the Egyptian Armed Forces, strengthening discipline, systems administration, and mission-critical operations. Passionate about clean code, software architecture, and enterprise-grade applications that solve real business challenges.

CORE COMPETENCIES

BACKEND	PHP, Laravel 12, Lumen, Slim Framework, Node.js, Flask
FRONTEND	JavaScript (ES6+), React.js, Blade, Tailwind CSS, Bootstrap, HTML5, CSS3
DATABASES	MySQL, MongoDB, Oracle Database
ARCHITECTURE	MVC, Modular Architecture, Multi-Tenant SaaS, Event-Driven, RESTful APIs
INTEGRATIONS	Third-Party APIs, Payment Gateways, Google Maps, WhatsApp, Groq LLM API
DEV TOOLS	Git, GitHub, Composer, NPM, Vite, Postman, PHPUnit, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelancer) — *Self-Employed* *Jan 2022 – Present*

- **Architected & deployed** 60+ web applications and 20+ enterprise systems (ERP, CRM, HR, SaaS, Real Estate) using PHP, Laravel, MySQL, and React, covering the full SDLC from requirements to deployment.
- **Designed** modular backend architectures, multi-tenant SaaS structures, and scalable MySQL database schemas to automate complex business workflows across multiple tenants.
- **Built** secure RESTful APIs, custom authentication systems, and role-based access control (RBAC) with interactive dashboards and real-time reporting tools.
- **Integrated** third-party APIs and payment gateways (Stripe, Paymob, PayPal) enabling automated transaction processing and seamless service expansion.
- **Developed** responsive user interfaces using Blade, Tailwind CSS, Bootstrap, and React.js, focusing on performance optimization and cross-device compatibility.

Microservices Backend Developer — *Freelance* *Oct 2024 – Sep 2025*

- **Engineered** lightweight, scalable microservices and backend components using Laravel and Lumen, decoupling monolithic workflows into maintainable service boundaries.
- **Designed** efficient API integrations and inter-service communication patterns, improving reliability of cross-system data exchange.
- **Optimized** application performance and MySQL database queries, reducing average response times on high-traffic endpoints.

Reserve Information Systems Officer — *Egyptian Armed Forces* *Nov 2024 – Oct 2026*

- **Administered** mission-critical information systems and IT infrastructure, ensuring maximum uptime, security, and operational efficiency in a high-discipline environment.
- **Delivered** technical support, systems documentation, and hardware/software organization, contributing to reliable mission-critical operations.

SELECTED PROJECTS

BARQ ERP — Multi-Tenant SaaS & Resource Rental Management *Laravel 12 · PHP · MySQL · Blade · JavaScript · REST APIs · Groq LLM*

- **Built** a modular ERP SaaS platform supporting tenant-specific data isolation and configurable business modules (HR, payroll, attendance, asset management, CRM, project management) with role-based access control and automated workflows.
- **Integrated** an LLM API using Groq to enable natural-language interaction with business data; developed the product landing page, configured a 14-day free trial, and deployed the application to a VPS environment.

Multi-Store Ordering & Delivery Management Platform *Laravel · PHP · MySQL · Blade · REST APIs · Google Maps · Payment Gateway*

- **Developed** a multi-store platform supporting restaurants, pharmacies, and retail businesses, with administrative interfaces for store management, branches, employees, and point-of-sale operations.
- **Implemented** payment processing, driver management, Google Maps routing, and WhatsApp-based ordering workflows with role-based access and store-specific management.

CRM & Business Workflow Management System *Laravel · PHP · MySQL · JavaScript · REST APIs*

- **Engineered** CRM functionality for managing companies, contacts, leads, sales opportunities, and deal pipelines, with activity tracking, notes, attachments, tags, communications, and deal-stage history.
- **Structured** the backend around modular business logic and relational database design to support maintainability and future expansion.

EDUCATION

Bachelor of Software Engineering — *Beni Suef University, Egypt* *2020 – 2024*
